CEREN AŞKİT

Highly motivated Software Test Engineer with a strong foundation in manual and automated testing and experience in working with Agile development model. Skilled in developing and executing comprehensive test plans, identifying and documenting software defects, and collaborating with developers to improve software quality. Proven track record in achieving high defect detection rates and reducing post-release issues. Committed to continuously improving skills. Communicates effectively and adapts easily.

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, SQL

Tools: JIRA, Confluence, IBM Tools

CERTIFICATES

ISTQB
Foundation Level | Dec 2024

Wtech Academy
Process Analysis | Jan 2023
Business Intelligence | Sep 2022

MEMBERSHIPS

President at Spatial Information Community of Hacettepe University | Nov 2019 – Dec 2021

Member of IEEE and Women In Engineering of Hacettepe University | Sep 2017–May 2018

LANGUAGE

TURKISH : Native

ENGLISH : Professional

GERMAN : Basic

EDUCATION

HACETTEPE UNIVERSITY | Sep 2017 – Jun 2022

Bachelor Of Engineering - Geomatics Engineering

GPA: 3,32/4,0

Genç HIGH SCHOOL & Bekir Gökdağ High School | 2012 – 2016

GPA: 87 /100

WORK EXPERIENCE

Avionics Software Test Engineer – BITES Defence and Aerospace | Apr 2025 – Present

- Designing and executing test cases for avionics systems, functional and regression testing, using equivalence partitioning, boundary values and state transition techniques.
- Analyzing and reporting on software metrics, identifying areas for improvement and implementing changes in software performance.
- Collaborating with software developers to identify and track software defects, bug-related delays and in overall code quality.
- Extensively utilizing IBM tools, including ClearCase, ClearQuest, and DOORS, for version control and requirements management and SCA Tool for examination the software components.

Avionics Software Test Engineer – SIMSOFT Information Technologies | May 2023 – Mar 2025

- Developed and executed comprehensive test scenarios for avionics software.
- Reported and tracked defects, ensuring timely resolution in collaboration with developers.
- Gained extensive experience with IBM testing tools and Agile workflows.
- Leveraging Jira as a project management and issue tracking solution to streamline workflows.
- Employing Confluence for collaborative knowledge sharing and documentation.
- Collaborating as a subcontractor for ASELSAN, contributing to high-priority projects.

INTERN - BITES Defence and Aerospace | Aug 2021 – Sep 2021

- Worked on an algorithm that performs viewshed analysis from a specific point using digital elevation model data in the Python programming language.

PROJECTS AND PUBLICATIONS

UZAL CBS 2022 | 17 – 19 Nov 2022

- **AUTOMATIC HANDLING OF POWER LINE CORRIDORS FROM LIDAR POINT CLOUD DATA**

VIII. UZAKTAN ALGILAMA CBS SYMPOSIUM, ISBN:978-625-7076-57-9, DOI:12799

GEOINFORMATION WEEK - Broadening Geospatial Science and Technology | 14-17 Nov 2022

- The paper titled "**Extraction of Point Cloud-Based Information for Powerline Corridors**" has been published and evaluated by the science committee as **one of the top 5 papers** of the conference.

The International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences. XLVIII-4/W6-2022. 41-46. 10.5194/isprs-archives-XLVIII-4-W6-2022-41-2023.

GRADUATION PROJECT | Sep 2021 – Jun 2022

Extraction of Point Cloud-Based Information For Powerline Corridors

- The project is the design and implementation of a point cloud-based powerline corridor mapping system, using supervised classification algorithms to the removal of obstacles close to the powerline to prevent an unintentional service interruption.
